TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES6+), PHP, HTML5, CSS3/Sass, SQL
Frontend	React, React Native, Vue.js, Next.js, Expo, Tailwind CSS, Vite, Redux
Backend	Node.js, Express.js, Laravel, RESTful APIs, JWT, Stripe API, OpenAI API
Databases	PostgreSQL, MongoDB, MySQL, Firebase (Firestore, Realtime DB)
Cloud & DevOps	AWS (Certified), Docker, CI/CD, Git/GitHub, Vercel, App Store Connect

EXPERIENCE

Founder & Full-Stack Developer *TheCrib* Sep 2025 - Present

- Independently designed, built, and shipped a cross-platform iOS sports team management platform to the App Store using React Native (Expo), TypeScript, and a Node.js/Express backend on AWS, acquiring 40+ users across 5 countries within the first month of launch
- Implemented Stripe-powered subscription billing across three pricing tiers (Free, Pro, Elite) with role-based access control, supporting the platform's first paying subscribers
- Integrated OpenAI API to generate structured practice plans on demand from natural language input, used by coaches to plan training sessions

Freelance Full-Stack Developer *Tori Stecum Traduction* Dec 2024 - Feb 2025

- Delivered SEO-optimized bilingual React application achieving 90+ PageSpeed score
- Built Node.js backend with automated email integration using Nodemailer
- Implemented CI/CD pipeline with Git/GitHub workflows and designed custom French/English translation system

Freelance Full-Stack Developer *Brass Door Pub* Jun 2025 - Aug 2025

- Designed mobile-first responsive restaurant website with React and CSS3 animations
- Implemented dynamic menu system with categorized items and interactive components
- Optimized assets and lazy loading for improved mobile performance

PROJECTS

FarmerFlow - PolyHacks 2025 Winner *React Native, TypeScript, Firebase, Expo*

- Won 1st place among 100+ participants by building full-stack farm management app in 24-hour hackathon
- Integrated Firebase auth, real-time weather API, and CSV parsing for inventory and plant health tracking
- Developed AI chatbot using OpenAI API for agricultural advice and task scheduling

Stash - AI Content Organizer (ConUHacks X) *React Native, Node.js, MongoDB, Google Gemini*

- Built full-stack web and mobile app in 24 hours that extracts, summarizes, and auto-categorizes content from any pasted URL using Google Gemini
- Designed modular URL extractor system supporting YouTube, Instagram, TikTok, Spotify, Amazon, and Google Maps
- Implemented JWT authentication, flexible MongoDB schema design, and AI-powered smart search with intent routing

EDUCATION & CERTIFICATIONS

Full Stack Web Development Diploma - Concordia University

December 2023

AWS Certified Cloud Practitioner (CLF-C02)

[View Certificate](#)

Notable Achievement: 1st Place - PolyHacks 2025 (100+ participants)

January 2025
